Abdelrhiiim AHMED

Backend Web Developer

OBJECTIVE

To obtain a challenging and rewarding position as a backend developer with Django and Django REST framework, where I can use my skills and experience to contribute to the development of high-quality web applications.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, TypeScript
- Web Frameworks: FastAPI, Django, Django Rest Framework
- Databases: SQL, MySQL, MongoDB, Neo4j, Elasticsearch
- Front-end Technologies: HTML, CSS, Tailwind CSS, Bootstrap, SASS
- Data Science: Numpy, Pandas, Scipy, Plotly
- Version Control & Tools: Git, Docker, Redis

WORK EXPERIENCE

Software Engineer - Backend

August 2018 – July 2019

Starks MU Team | Mansoura University

- Developed web applications using Python, Django, and Django Rest Framework
- Worked collaboratively with team members to design and implement back-end architecture for web applications
- Utilized version control tools such as Git to manage codebase
- Conducted unit tests and integration tests to ensure application functionality and quality

Freelance Backend Web Developer

- Built and deployed websites using Python and FastAPI framework
- Developed server-side functionality using Django and Django Rest Framework
- Created and managed databases using SQL, MySQL, MongoDB, and Elasticsearch
- Utilized version control tools like Git and Docker to ensure smooth development workflow
